[S] SUBJECTIVE (HISTORY & SYMPTOMATOLOGY)

Chief Complaint: Chronic low back ache for 12 weeks.

History of Present Illness (HPI): 50-year-old patient reports 12 weeks of persistent lower back pain. Severity rated 4-6/10. Aggravated by prolonged standing. Denies lower extremity radiation, weakness, numbness, or bladder changes. Patient states no physical therapy was ever tried. Patient was recently informed by employer of health coverage transition.

[O] OBJECTIVE (EXAM & PHYSICAL THERAPY RECORD)

Vital Signs: BP 130/82 mmHg, HR 76 bpm, BMI 27.8.

Physical Exam: Normal gait. Generalized lumbar tenderness. Negative straight leg raise bilaterally. Neurological examination intact throughout bilateral lower extremities.

Payer Verification: Clearinghouse 270/271 eligibility query returned **INACTIVE / TERMINATED COVERAGE** for policy on date of service.

Conservative Therapy: No physiotherapy attempted (0 weeks).

[A] ASSESSMENT (DIAGNOSES & PRIOR AUTH POLICY EVALUATION)

Primary Diagnoses:

- Chronic low back pain (ICD-10 M54.5)
- Lumbosacral spondylosis without radiculopathy (ICD-10 M47.816)

Prior Authorization Guideline Criteria Evaluation:

- Active Insurance Coverage: **NOT MET (Plan coverage is inactive / terminated)**
- Symptom / Pain Duration Threshold (≥ 6 weeks): **MET** (12 weeks documented)
- Trial of Supervised Physical Therapy (≥ 6 weeks): **NOT MET** (0 weeks attempted)

Recommendation: **DENY** — Insurance coverage is inactive, and prerequisite physical therapy trial was not completed.

[P] PLAN (IMAGING STUDY, INTERVENTIONS & ORDERS)

- Insurance Coordination:** Patient instructed to contact benefits coordinator to resolve coverage reinstatement.
- Conservative Treatment:** Physical therapy referral on hold pending active coverage verification.
- Diagnostic Imaging:** Prior authorization cannot be approved under inactive insurance policy.
- Follow-up:** Re-contact clinic once coverage is active to schedule physical therapy.
